

63rd and Cottage Grove

The 63rd and Cottage Grove Green Line Station serves the Woodlawn community near the University of Chicago. The main objectives of the eHub are to expand various affordable housing developments, provide programming and youth development through arts organizations and the Blacks in Green (BIG) organization, and stimulate local businesses through the nearby Sunshine Enterprise Incubator. In addition to redeveloping the former Washington Park National Bank Building for the community, the eHub will also look to direct large-scale tree plantings as part of the 61st Street Tree Canopy Initiative.

Data below represent the indicators and metrics that Elevated Chicago is monitoring as part of its work plan: <http://www.elevatedchicago.org/our-work-plan/> [Data last updated: 7/31/2019]
